automation (RPA) to scale decision making.

Projects:

MarksManagment-System

The Project is based on React.js and Node.js Javascript Technologies . NodeJS is a framework of JavaScript which is mainly used for working with the backend of our application or building the backend using JavaScript, whereas ReactJS is a JavaScript front-end library. The database Used for building the project is MONGODB.

PetStore Management System :

The project describes the solution for the Customer to buy the desired pet of his own necessity and the services that pet requires are shown through a website for time saving of customer to not visit the shop and can buy through Online.It is developed using Java Full Stack.

My Portfolio :

A portfolio is made up using the React.js as Frontend and Mongodb as Backend application. This portfolio describes my Education and Skills and my Projects and Certifications. This depicts my skill set and interest in Frontend development. It is my dream to become a Full Stack Developer.

My portfolio link which is not responsive for mobile phones is deployed on Netlify.
